

Prima Uña de Gato II

Cat's Claw 3% Alkaloids

Prima Uña de Gato II (capsules #55041 and liquid #55081) replaces Prima Uña de Gato (#55040 and #55080). This replacement formula utilizes a high quality whole bark extract of cat's claw, to insure it offers the synergy of all the constituents in cat's claw. It also has a minimum of 3% total alkaloids. We no longer label it 'TOA-free', because we could find no corroborating evidence in the research literature for the actual use of cat's claw, that tetracyclic alkaloids (TOAs) have any significant effect on pentacyclic alkaloids (POAs).

The essential formulations have not changed. Like our original Prima Uña de Gato, **Prima Uña de Gato II Capsules** contain the minerals magnesium, manganese, and chromium, as well as enzymes. **Prima Uña de Gato II Liquid** contains no enzymes, and a serving contains minerals at these typical levels: Magnesium 2.0 mg, Potassium 0.42 mg, Sodium 0.28 mg, and Boron 2.2 µg.

#55041
90 vegetarian
capsules

#55081
30 mL (1 fl. oz.)

Key Features

- Cat's Claw bark extract with minimum 3% total alkaloids
- May help modulate and support immune function*
- May provide antioxidant activity, support circulation, and promote microbial balance*

For most individuals, transferring to the new formulas drop for drop, and capsule for capsule, should be possible. However, since it is more concentrated, some sensitive individuals may want to begin with less and increase gradually according to tolerance.

Cat's claw (*Uncaria tomentosa*) is a woody vine that has long been used by indigenous healers in the rainforests of the Peruvian Andes and elsewhere in South America and Central America.* Its use dates back to the 1500s and the ancient Incan Empire. Asháninka priests in Peru reputedly considered cat's claw to have great powers and life-giving properties.*

In recent times cat's claw has been studied for its ability to support gastrointestinal and immune functions.* Research suggests that in the gastrointestinal tract it can support healthy microbial balance and soothe irritated tissue.* Cat's claw has antioxidant properties, and it may support circulation by strengthening capillaries.* Active constituents include pteropodine, isopteropodine, rhynchophylline, mitraphylline, hirsutine, and quinovic acid glycosides.

Prima Uña de Gato II Liquid

#55081 • 30 mL (1 fl. oz.)

Supplement Facts

Serving Size 5 Drops (0.25mL)
Servings Per Container 120

Amount Per Serving % Daily Value

Cat's Claw Bark Extract 1:4 50 mg †

Concentrated Minerals 10%

† Daily Value not established.
