

Vitamin C

Vitamin C is one of the most important water-soluble antioxidant nutrients and is involved in a wide variety of biochemical reactions throughout the body. Humans, unlike most other mammals, cannot manufacture vitamin C, so we must rely on food or nutritional supplements. Vitamin C is stored in tissues throughout the body, and is especially concentrated in the adrenal glands, where it is crucial for the production of adrenal hormones involved in responding to stress.* The body uses vitamin C in immune system functions including white blood cell production, histamine release and degradation, the reduction of glutathione, and the metabolism and protection of several other nutrients.* Vitamin C is involved in detoxifying heavy metals such as lead, cadmium, mercury and nickel.* It is involved in the production of collagen and elastin, important connective tissue proteins.* Vitamin C may also support HDL cholesterol within normal levels, and bone mineral density.*

NutriCology® has pioneered the development of buffered vitamin C products, and continues to offer the purest and least allergenic vitamin C products available. In addition to its hefty content of ascorbic acid, our buffered vitamin C also supplies the macro-minerals calcium and magnesium at approximately one half the RDI per heaping teaspoon, which may make it desirable for individuals who do not regularly consume dairy products.*

Buffered Vitamin C Powder is formulated with carbonates of calcium, magnesium, and potassium, giving an acid-alkaline buffering action (pH 7.0 in water), potentially improving bowel tolerance and minimizing hyperacidity.*

NutriCology® Buffered Vitamin C has been used clinically for offsetting acute hypersensitivity reactions and the addictive craving for foods, cigarettes and other withdrawal states from stimulants and alcohol.* A study at the Haight-Ashbury Free Clinic in San Francisco demonstrated that Buffered Vitamin C could offset and reduce withdrawal symptoms for stimulants and opiates by 90% in outpatients, who took a teaspoon of Buffered Vitamin C whenever they felt a craving.*
